CSCI 1300: Starting Computing

Fall 2023

Hi! I'm Chanheum Park

- Call me **Chanheum** (Pronouns: He/Him)
- **Research interests:**
  - Human-Pose-Estimation
  - XR/AR/VR : e**X**tended **R**eality, **A**ugmented **R**eality, **V**irtual Reality
- **Office Hours:** ECOT 743 (Campus Map)
  - Mondays - 5:00 PM ~ 6:30 PM
  - Wednesdays - 10:30 AM ~ 12:00 PM
- **Email:** Chanheum.Park@colorado.edu

What is Computer Science?

- The study of the principles and use of computers
- Discipline that spans **theory** and **practice**.
  - in both abstract and concrete terms
- Uses **computational thinking** to solve problems
- Makes computers do new things or accomplish tasks more efficiently

“Computer Science is no more about computers than astronomy is about telescopes”

-Edsger Dijkstra

What are we computing?

- Design, analysis and experimentation
- Automation of tasks, improving existing solutions
- networking(the Internet), artificial intelligence(AI), machine learning (ML)

Why Computer Science?

Canvas

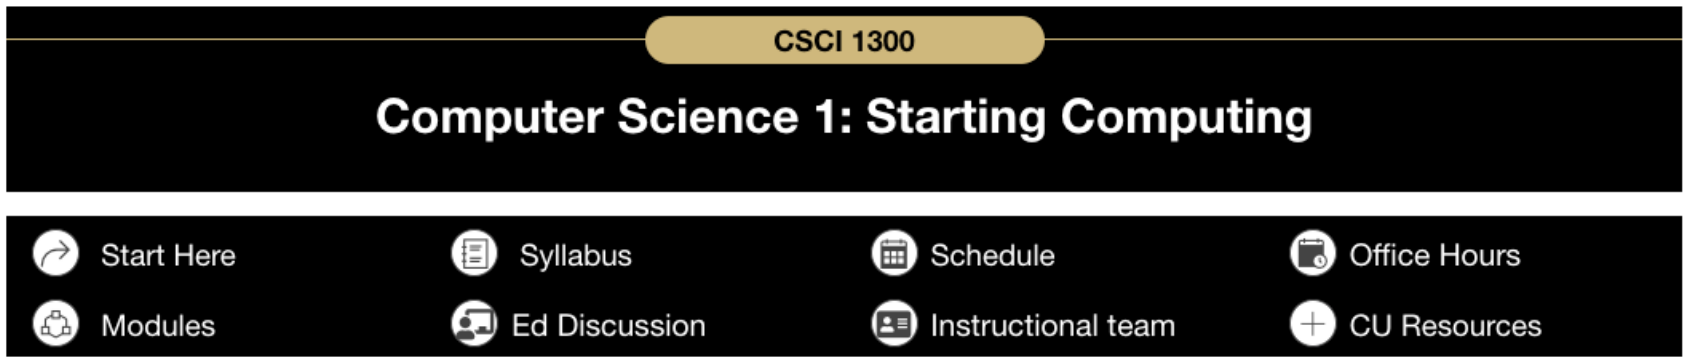
Recent Announcements



Welcome to Computer Science 1: Starting Computing

CSCI 1300 is a 4 credit hour course that teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in a range of application domains. The course is appropriate for students with little to no experience in computing or programming. For the Fall 2023 semester, the Instructors are listed below.

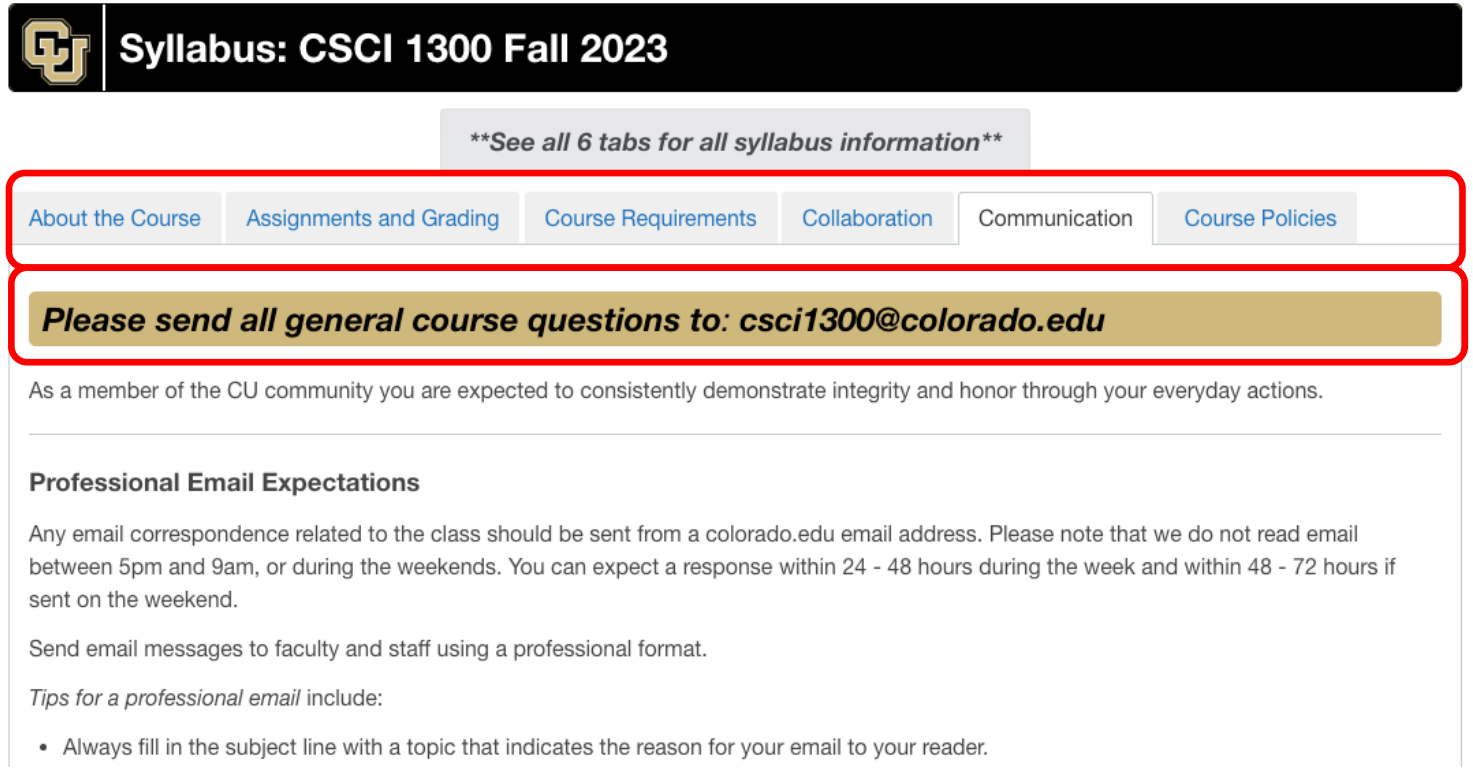
Communication

- Send **ALL** questions to **csci1300@colorado.edu**: academic, accommodations, sports, travelling, health issues or concerns



Syllabus: CSCI 1300 Fall 2023

See all 6 tabs for all syllabus information*

About the Course | Assignments and Grading | Course Requirements | Collaboration | Communication | Course Policies

Please send all general course questions to: csci1300@colorado.edu

As a member of the CU community you are expected to consistently demonstrate integrity and honor through your everyday actions.

Professional Email Expectations

Any email correspondence related to the class should be sent from a colorado.edu email address. Please note that we do not read email between 5pm and 9am, or during the weekends. You can expect a response within 24 - 48 hours during the week and within 48 - 72 hours if sent on the weekend.

Send email messages to faculty and staff using a professional format.

Tips for a professional email include:

- Always fill in the subject line with a topic that indicates the reason for your email to your reader.

Computing

- We will use C++
  - Great mix of efficiency and ease of translating experience to other language later in your computing life

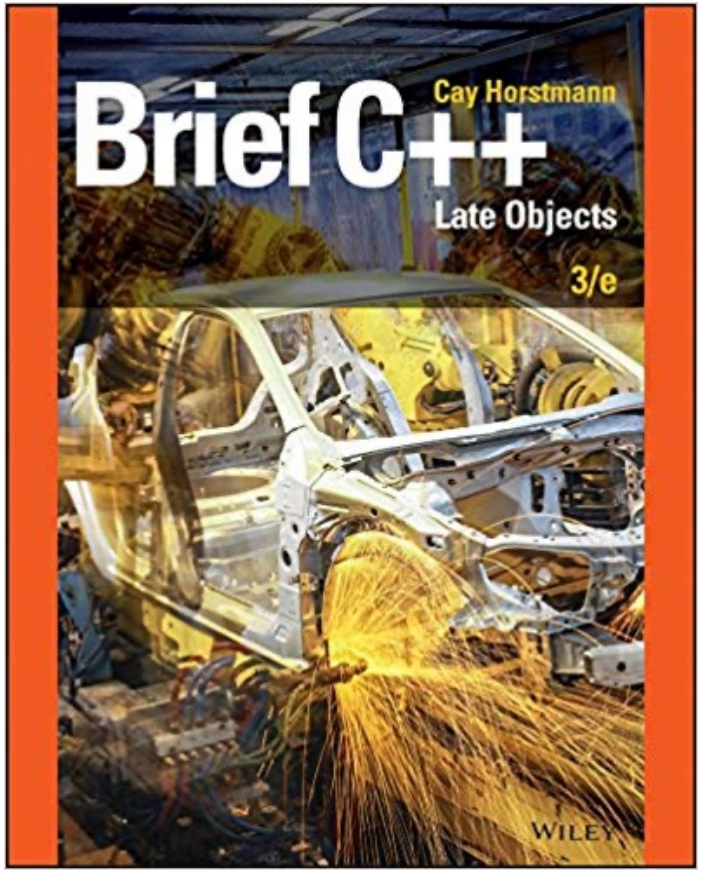
- Visual Studio Code (IDE – Integrated Dev Env)
  - Nice interface to program
  - Debugger, all-in-one platform
  - Talk more later, and in recitation

Textbook – available through Canvas

Brief C++: Late Objects 3rd edition, by Cay Horstmann

- Only available in electronic form
- International, old and PDF editions are okay, *but will lack online activities*, which we will do in lecture and recitation

Additional reading will be linked to the course Modules as needed



Let’s syllabus

You are responsible for knowing and reviewing:

- Exam policy
- Assignments and late submission policy
- Attendance policy
- Classroom behavior
- Collaboration and honor code
- Office Hours policies
- Ed Discussion policies
- Interview policies
- Discrimination and harassment
- Disability accommodations
- Religious observances
- Sexual misconduct, discrimination, harassment and/or related retaliation

Let’s syllabus

You are responsible for knowing and reviewing:

- **Exam policy**
- Assignments and late submission policy
- Attendance policy
- Classroom behavior
- Collaboration and honor code
- Office Hours policies
- Ed Discussion policies
- Interview policies
- Discrimination and harassment
- Disability accommodations
- Religious observances
- Sexual misconduct, discrimination, harassment and/or related retaliation

Three (3) midterms

Syllabus: “score of at least a 67% average on the midterms or you cannot receive better than D+ in the course.”

The final exam time slot can be used to take an optional final. However, the final exam score will replace your lowest midterm score.

Let’s syllabus

Workload:

- Homeworks (30%)
- Projects (20%)
- Weekly recitation activities (10%, drop lowest): Attendance in recitations is required.
- Midterms (30%): 67% exam average required to earn a C- or higher in the class (Oct 5th, Nov 2nd, Nov 30th)
- Class participation (10%, drop 3 lowest)

Let’s syllabus

You are responsible for knowing and reviewing:

- Exam policy
- **Assignments and late submission policy**
- Attendance policy
- Classroom behavior
- Collaboration and honor code
- Office Hours policies
- Ed Discussion policies
- Interview policies
- Discrimination and harassment
- Disability accommodations
- Religious observances
- Sexual misconduct, discrimination, harassment and/or related retaliation

Back up your work!

- Google Drive
- Dropbox
- GitHub (**private** repository)
- **No extensions** in event where you didn’t back up your work

Let’s syllabus

You are responsible for knowing and reviewing:

- Exam policy
- Assignments and late submission policy
- **Attendance policy** → **Recitation:**
  - Weekly, mandatory lab with programming activities.
  - Ask questions about assignments and get extra help.
- Classroom behavior
- Collaboration and honor code
- Office Hours policies
- Ed Discussion policies
- Interview policies
- Discrimination and harassment
- Disability accommodations
- Religious observances
- Sexual misconduct, discrimination, harassment and/or related retaliation

Attendance Policy

- You must attend recitation each week
  - Your TA will take attendance
- Recitation materials will be posted on Friday the previous week
  - Weekly graded discussion will happen in recitation
  - Time to work on recitation assignments and ask questions
- If you need to miss recitation, make arrangements to attend another recitation: email **both TAs** and csci1300@colorado.edu

Getting help outside lectures

Office Hours calendar on Canvas (TAs, LAs, instructors) – in-person

- *Learning Assistants (LAs)*
  - Undergrads who took this class and love programming. Many of them will lead recitations!
- *Teaching Assistants (TAs)*
  - Graduate students who are enthusiastic and excited about teaching!
  - Lead recitations, help grade, develop materials, field questions on ED, office hours

Ed Discussion

Invite link on Canvas

Announcements will be posted here

- Ask questions in Q & A forum (and answer other students' questions!)
  - There are hundreds of you and only a few of us -- get answers faster
- Discuss work, but **do not post solutions/vital code**
- Send **private** messages to TAs and faculty

Let’s syllabus

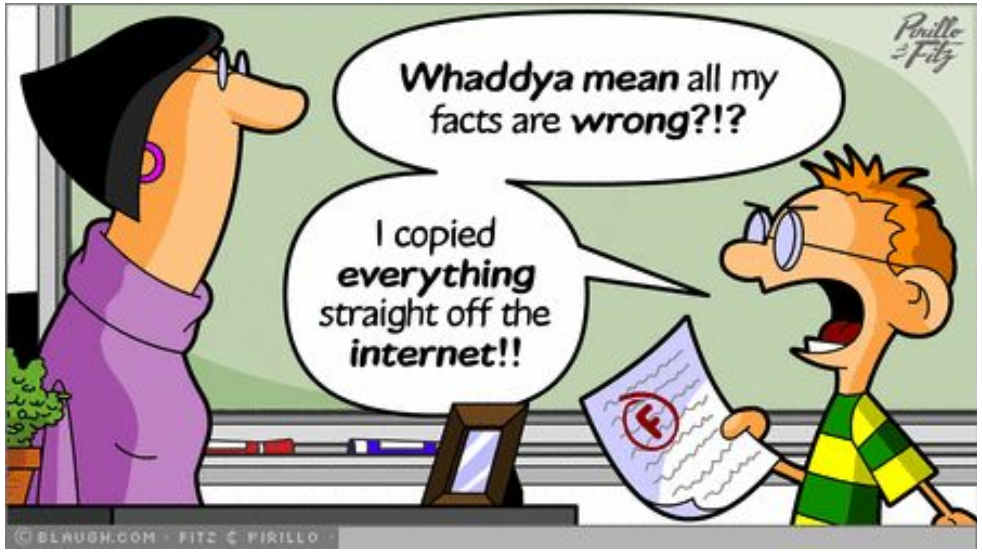
You are responsible for knowing and reviewing:

- Exam policy
- Assignments and late submission policy
- Attendance policy
- Classroom behavior
- **Collaboration and honor code**
- Office Hours policies
- Ed Discussion policies
- Interview policies
- Discrimination and harassment
- Disability accommodations
- Religious observances
- Sexual misconduct, discrimination, harassment and/or related retaliation

Academic Integrity

See the Course Policies tab on the Syllabus page for more details. Here are some highlights.

- "Examples of cheating include copying the work of another student during an examination or other academic exercise (includes computer programming)"
- "Examples of plagiarism include: [...] copying information from computer-based sources"
- If in doubt, ask us if it's permitted.



Riding the struggle bus

It's ok to struggle (we all did and still do)

When you're asking for help, be sure to explain...

- what you're trying to do
- what you think should happen
- what you get instead (copy/pastes or screenshots work well)
- what all you have tried
  - if you haven't tried anything, try something first
- use **private** Ed posts (post a "Note") to Instructors if it includes possible solution code

Don't be stuck! Post on Ed, get help during Office Hours!

Riding the struggle bus

Life is hard. We want to help however we can.

- Reach out **before** things get too bad. After is also better than going at it alone.
- Students of Concern Team -- https://www.colorado.edu/studentaffairs/student-concern
- Student Support and Case Management -- https://www.colorado.edu/studentaffairs/sscm 1
- Counseling and Psychological Services -- https://www.colorado.edu/counseling
- The **Red Folder** -- https://www.colorado.edu/redfolder

Due this week

- Read the Syllabus on Canvas
  - Take the **Syllabus Quiz**.
- Homework 0 - **Install VS Code**
  - Tutorials and videos on Canvas, based on the operating system of your computer
- Recitation 0
- Check the due dates!!!

Goal

- Develop adaptive expertise for problem solving with computers
- “The ability to apply meaningfully-learned knowledge and skills flexibly and creatively in different situations. This goes beyond acquiring mastery or routine expertise in a discipline...”
- “Involves the willingness and ability to change core competencies and continually expand the breadth and dept of one’s expertise”

Next time

- Writing our first program.

Questions?
